Why TechSaathi?

Built to make digital learning practical, safe and confidence-driven.

Practical Learning

Practice real digital tasks in a safe, simulated environment.

Build Confidence

Understand how to use digital tools before using them in real life.

Stay Safe

Recognize scams, avoid mistakes and use technology more securely.

Current Active Modules

Core simulations currently available in TechSaathi v1.

UPI Payment Practice

Learn how to make safe digital payments through guided simulation.

Form Filling Practice

Build confidence in completing essential online forms accurately.

Scam Awareness

Identify suspicious messages, fake offers and common digital fraud patterns.

Password Protection

Understand secure password habits and basic account safety practices.

Built for Growth

TechSaathi follows a phased development model. The current version focuses on high-impact digital essentials, while future versions can expand into areas such as online shopping safety, ticket booking, bill payments, QR code awareness and government service access.

This approach ensures that the platform remains practical, scalable and aligned with real-world digital literacy needs.
